

# HOTEL MANAGEMENT

## COMPLETE HOTEL MANAGEMENT AT THE TIP OF YOUR FINGERS!

The Jonas Hotel Management system utilizes a complete suite of programs to effectively manage all of your reservations, guest details, and room requirements. As with other Jonas applications, the flexibility of Hotel Management allows you to build the codes, descriptions and system functionality to best meet the specific needs of your property. Hotel Management is fully integrated with the Jonas Accounting, Point Of Sale, and Membership applications, and its easy to use features make it an ideal solution for any club offering overnight accommodations.

### INTEGRATION

Complete integration with your current Jonas back office system allows such time saving features as placing member charges directly on the folio, posting charges directly to member accounts, and even the ability to print all associated chits at the time of checkout.

### E-MARKETING

To engage guests from the moment they book rooms, e-Marketing Letters allows you to email (or mail) customized confirmations, pre-stay reminders and post-stay 'Thank You' notes and offers.

### CUSTOM REPORTING

Custom reports based on Guest History and Tracking Details enable your club to develop a list of attributes which are common among repeat visitors, and then target those members for upcoming promotions.

### INTERFACING ABILITY

The Jonas Hotel Management application offers the ability to interface with many third part applications, ensuring a robust feature set for your hotel. Interface with call accounting applications, TV movie billing software, pass key generators, voicemail programs and many more.
