# LESSONS MANAGEMENT

ALLOWING YOUR STAFF, SERVICE PROVIDERS AND MEMBERS TO MANAGE LESSONS & SCHEDULES

Lessons Management is more than just a new back office booking application, and it's more than just a new online booking application. It's a whole new way to help manage the schedules of your staff and service providers, while giving them a new way to interact with your members.

EASY TO ADMINISTER

Direct – Members can contact your club directly to book lessons.

Online – Members can use the online portal to book lessons directly with a service provider from the comfort of their own home.

Mobile – Service Providers and Members can book lessons with each other, directly from their mobile device anytime and anywhere they want.

SERVICE PROVIDER ACCESS

Never let your service providers miss an opportunity to book a lesson with the unique Provider Portal. This portal allows your service providers to access their own schedule online, or via a mobile device, and book lessons with a member on the fly.

ONE-TO-ONE LESSONS

Lessons Management isn't just for the Golf Pro, it's built to handle any type of one-to-one lesson offered at your club. Service providers offering everything from Personal Training, to Tennis or Spa Services can be entered into the system, allowing members to easily access and book their next session.

MEMBER BOOKINGS

Of course members can still call the club directly to book an appointment, but in a world filled with online booking available 24 hours a day, you know what they really expect. With Lessons Management, members can access a private booking interface from their home computer or mobile device, see a complete schedule of availability for a specific provider and service, and book. All within just a couple of clicks.
